Author Guidelines for Proceedings

INTRODUCTION

Dear Author,

Please follow these simple instructions when preparing your final manuscript. This will not only help to publish your manuscript faster. These instructions are also essential to get your manuscripts indexed e.g. by Google Scholar or other abstracting and indexing services. Their own guidelines and our own experience have shown that following the rules described below are important.

Thank you for publishing with Atlantis Press!

GENERAL

- Use the template as provided. In particular:
  - **<u>Do not</u>** include page numbers, headers or footers;
  - **<u>Do not</u>** include blank pages;
  - **<u>Do not</u>** change the layout and margins of the Word template:
    (4.40 cm/Bottom: 4.40 cm/Left: 4.40 cm/Right: 4.40 cm)
  - Do not do changes to the Word template. Follow the template layout carefully.

  Use a spell-checker and proof-read your manuscript before submitting:
  - Please note that the manuscript submitted to Atlantis Press is considered as final, complete, and camera-ready. No changes can be made in the later stages. The paper will be published as provided.

FRONTMATTER

Title
- Check that the manuscript title is in upper lower case, following APA Style:
  - Capitalize the first letter of each word including Nouns, verbs (including linking verbs), adjectives, adverbs, pronouns, and all words of four letters or more;
  - Other words including short (i.e., three letters or fewer) conjunctions, short prepositions such as "for", "and", "or" are lower case
  - Correct example: Texturization of Monocrystalline Silicon Wafers
  - Wrong example: TEXTURIZATION OF MONOCRYSTALLINE SILICONE WAFERS
- Correct any spelling errors
- If there is a subtitle, place it below the title but in a smaller font size

Authors and Affiliations
- Enter all authors' first name and surname and follow the "first name last name" format without any punctuation
- If the author has no last name, then repeat the first name e.g. "Abyasa" => "Abyasa Abyasa".
  Note: Unfortunately, Google Scholar does not properly index publications with authors without a last name.
- Mark the corresponding author by adding an asterisk ("*") after their name. If no corresponding author is marked the first author will become corresponding author by default. Reselection after publication is not possible.
- Provide an email address for the corresponding author (mandatory)
- Provide the affiliations for all authors with department name, [division], institution/affiliated university, city, country
  - Example: *Sport Cancer Laboratory EA4670, Luminy Campus, Aix-Marseille University, Marseille, France.*
- Add the affiliation identifier (e.g. 1,2,3) in superscript to the matching author and affiliation in the correct order
- Please note that the department name and other affiliation details should be provided in English.

Abstract
- Provide a complete and correct abstract summarising your work. Abstracts are mandatory
- If you cite literature in the abstract, always refer to it explicitly and write out the whole citation (e.g. *Surname, Initials (year), Article Title, Journal title/Book title, Volume Number (Issue Number), Page range*)

MAIN CONTENT

Keywords
- Provide keywords capturing the main ideas of your manuscript. Keywords are mandatory
- Separate the keywords with a comma (",")
- A minimum of at least 3 keywords should be provided.

Body
- All heading should be appropriately nested
- All headings should be numbered in a consistent way (e.g. 1.1 & 1.1.1 & 1.1.1.1, etc.) in order to differentiate the headings
- Do not jump levels of headings - e.g. do not include a 3rd level heading right after a 1st level heading
- Ensure that the heading and at least 2 lines of content are displayed on the same page (i.e. avoid "orphans" and "widows")

References and Citations
- Every reference must be cited in the text
- Citations should be formatted consistently in line with conference organizer guidelines (if any)
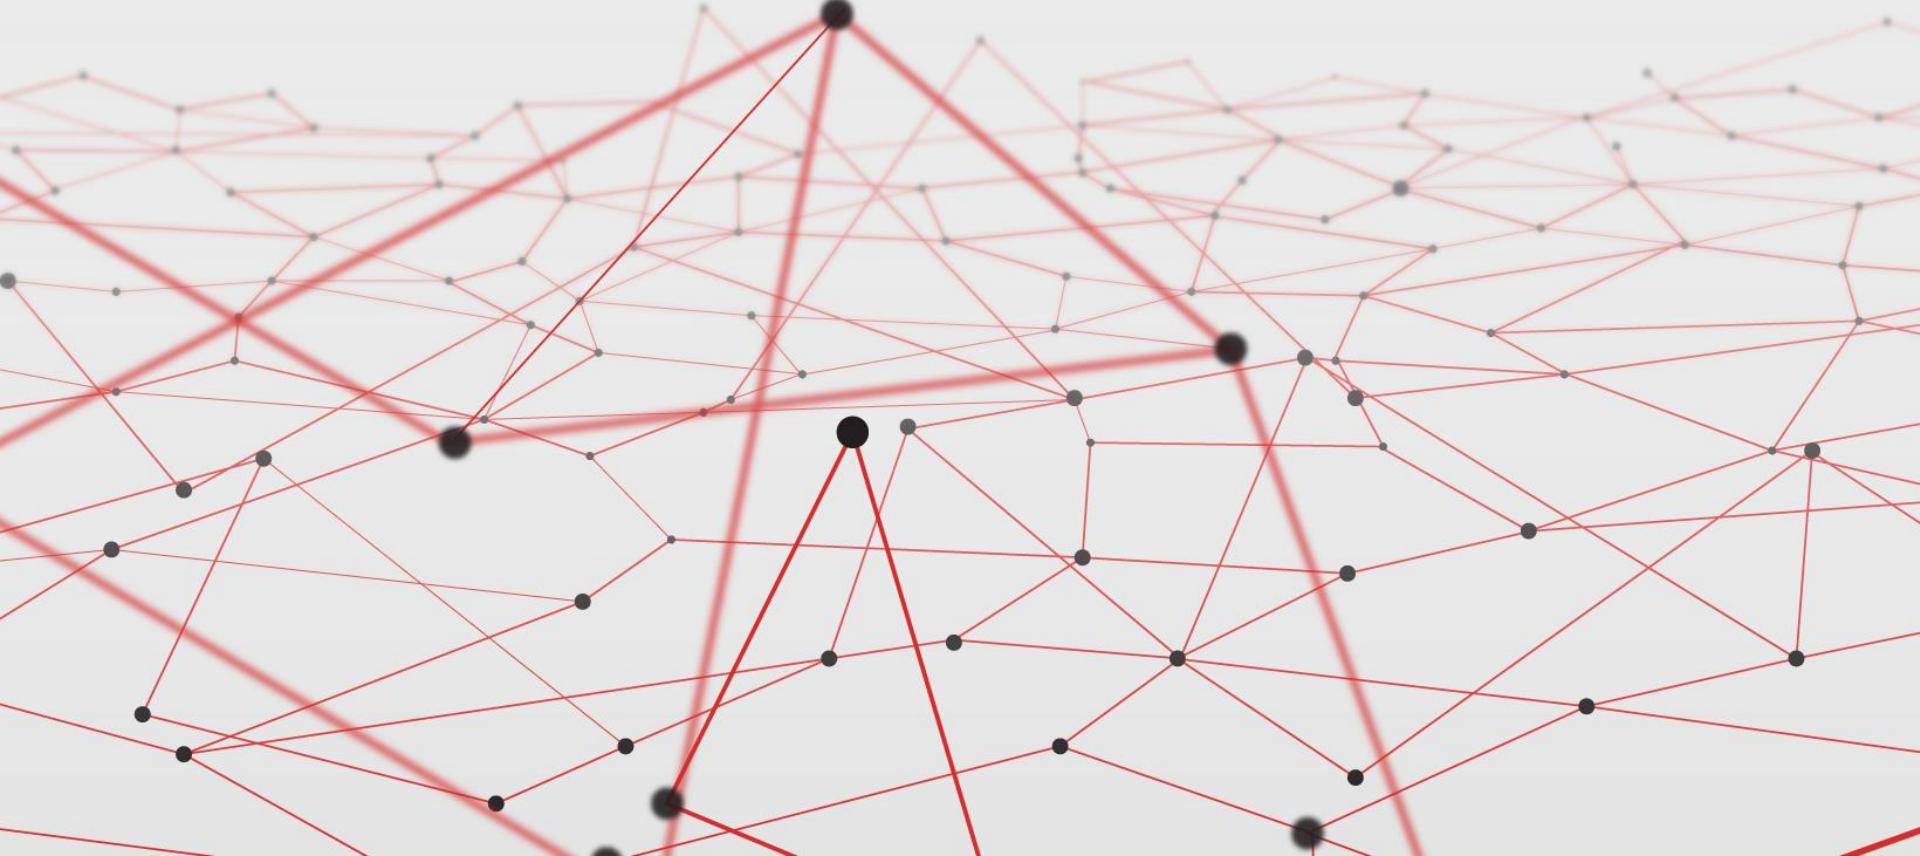

Lists, Tables, Figures
- Use the standard list styles
- Try to place any table and figures close to where it is cited and used
- All figures and tables must be numbered in a sequential order and they must have a caption
- The caption must include the number of the figure or table
- Place the caption close to that figure or table and on the same page
- Ensure that no text or other parts of the manuscript are hidden behind a table, list, or figure
- Ensure that tables and figures fit the text area of the template's layout.
- Tables must be included as Word or LaTeX tables in an editable format – they must not be included as pictures or screenshots

BACK MATTER

References

- Include the references at the end of the manuscript
- The references must be formatted in a consistent style within the manuscript (e.g. use the standard style as outlined in the template or follow the guidelines by the conference organisers)
- All references must be in Roman script
